# Procedure for installing a print queue on Mac in LPD

After double-clicking on the website image, the **SecurePrintStudent4EN.app** (or **SecurePrintStaff5EN.app**) application launches. Double click on its icon

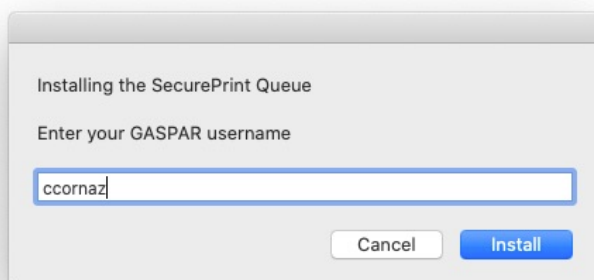

Accept to open it

An icon should hop in the dock; click on it

Then enter your username Gaspar

Procedure for installing a print queue on Mac in LPD

The queue creation message appears at the top right of the screen. No need to click on it (because it will restart the queue creation operation from the beginning)

You can check in System Preferences if your print queue is well created and has your username at the end of the name. Example: SecurePrint2Mac-ccornaz
